Overview

Billiard Poker is a **4-player free-for-all** billiards game that combines poker and pool. Each player receives seven poker cards, and each card corresponds to a numbered ball on the table. Players take turns pocketing the balls represented by their cards while avoiding penalties. The first player to complete all required balls and successfully declare victory on their next turn wins the match.

Players

- 4 Players
- Individual competition (not teams)
- Turns rotate **clockwise** throughout the game.

Example turn order:

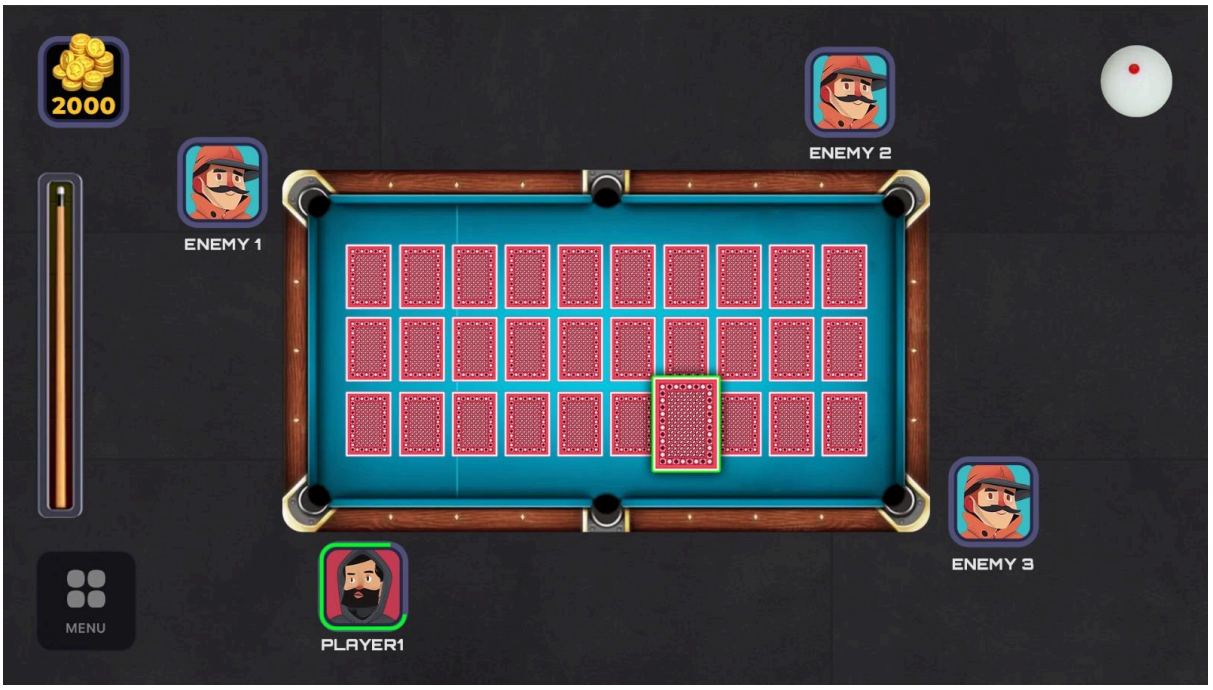

1. Player 1
2. Player 2
3. Player 3
4. Player 4

Repeat until a winner is declared.

Determining the Break

Each player picks one card from a standard 52-card deck spread face down on the table.

The highest card breaks first.

Card Ranking

K > Q > J > 10 > 9 > 8 > 7 > 6 > 5 > 4 > 3 > 2 > A

Ace is always the lowest card.

If two or more players draw the same rank, the suit determines the winner.

Suit Ranking

♠ Spades > ♥ Hearts > ♦ Diamonds > ♣ Clubs

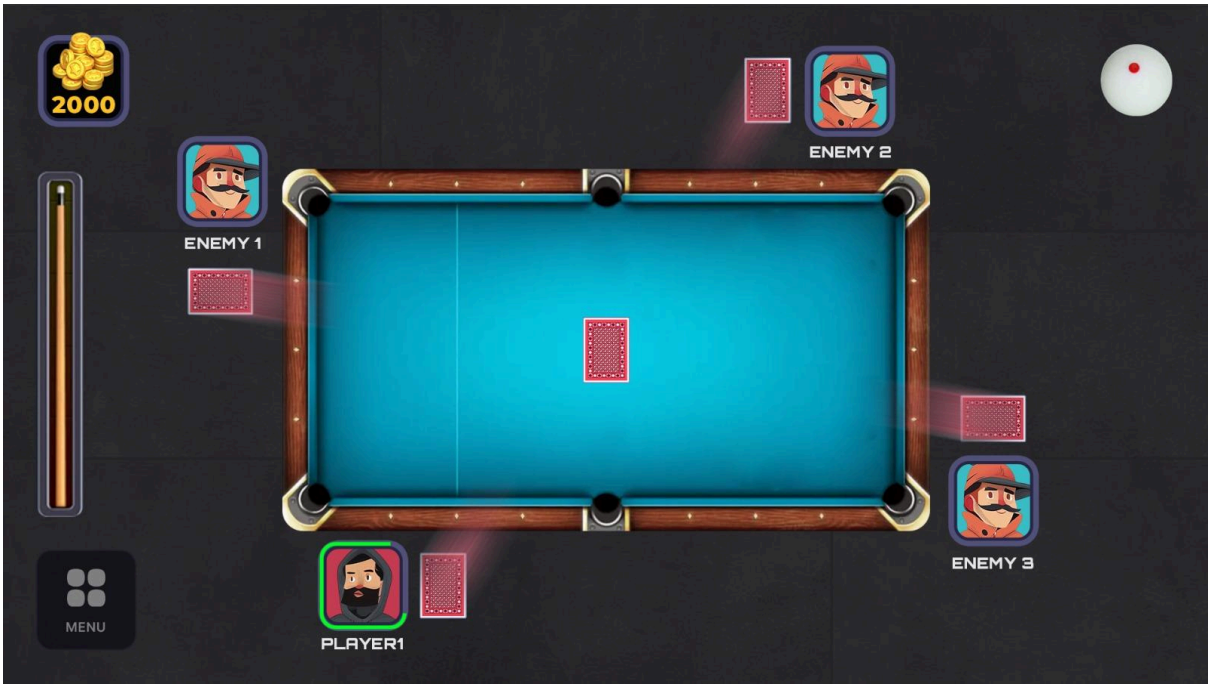

Example:

- A♠ beats A♥
- K♦ beats K♣

The remaining players shoot in descending order based on the draw.The POV of each player should be the bottom corner, and rotate clockwise.

Dealing Cards

After the break order is set, each player is dealt **7 poker cards**.

These cards determine the numbered balls that the player must pocket.

Card-to-Ball Mapping (All suits: ♠ Spades, ♥ Hearts, ♦ Diamonds, ♣ Clubs)

Card	Ball
Ace	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
Jack	11
Queen	12

King 13

Duplicate cards only require the corresponding ball to be pocketed once.

E.g:
A♠ A♥ A♦ A♣ 7♥ 7♦ 7♣ = You only need to pocket 2 balls, 1 and 7.
2♠ 8♥ 5♦ 5♣ 7♥ Q♦ K♣ = You need to pocket 6 balls, 2, 8, 5, 7 12, and 13

All 4 players should not receive duplicate cards in the same number and same rank. Therefore, no two players can receive the same exact card.

For example, only one player can receive **A♠**, only one can receive **7♥**, and only one can receive **K♦**.

However, players can still have the same number/rank if they have different suits.

Show card: The system must automatically show “1” card to all players after the ball has been pocketed. Show card - Raise the card into half. Showing that the player pockets the right ball.

For example the Player 1 has **A♠ A♥ A♦ A♣ 7♥ 7♦ 7♣,** he pockets ball 1 (Aces in equivalent), only shows “one” of the Aces in random ranking, no need to show all four aces.

For example the Player 2 has **2♠ 8♥ 5♦ 5♣ 7♥ Q♦ K♣,** he pockets ball 5, only shows one of the 5 card random in ranking (**5♦ or 5♣**), no need to show the other 5.

Gray out card:
If the player pockets the ball, it must gray out “one” of his cards. For example the Player 1 has **A♠ A♥ A♦ A♣ 7♥ 7♦ 7♣,** he pockets ball 1,only greying out 1 of his cards and not 4 cards.

Free Balls

Balls **14** and **15** are **Free Shot Balls for all players**

Pocketing Ball 14 or 15 awards **one extra shot**.

These balls are not assigned to any player.

Taking Your Turn

On every shot:

1. Reveal the poker card that matches the ball you intend to play.
2. The **first ball contacted by the cue ball** must match the revealed card.
3. If the correct ball is legally pocketed, that card is completed and removed from your hand.
4. Continue shooting until you miss, foul, or your turn ends.
5. Timed out**:** After your time runs out and the player has not taken the shot, they will receive a penalty card and shoot to the next player.

Penalties

Wrong First Contact

If the cue ball first contacts a ball that does not match your revealed card:

- Receive **1 additional penalty card**.
- Your turn ends.

Wrong Ball Pocketed

If you pocket a ball that is not represented by your cards:

- Receive **2 additional penalty cards**.
- Your turn ends immediately.

Penalty cards become new objectives that must be completed before you can win.

Showing Your Cards

Before every legal shot, you must reveal the matching poker card.

This proves that the ball you are attempting belongs to your current objectives.

Completing Your Cards

After pocketing all required balls:

- You do **not** win immediately.
- You must wait until your next scheduled turn.

When your turn begins, announce **"Declare Winner."**

If no other player has already declared victory, you win the game.

Race to Declare

Because victory is only awarded at the start of your next turn, another player may finish their objectives and reach their turn before you.

Example:

- Player 1 completes all required balls.
- Before Player 1's next turn, Player 3 also completes all required balls.
- Player 3's turn arrives first, and they declare victory.

Player 3 wins the match.

This creates an exciting race where turn order is just as important as shot-making.

Example

Player 2 receives:

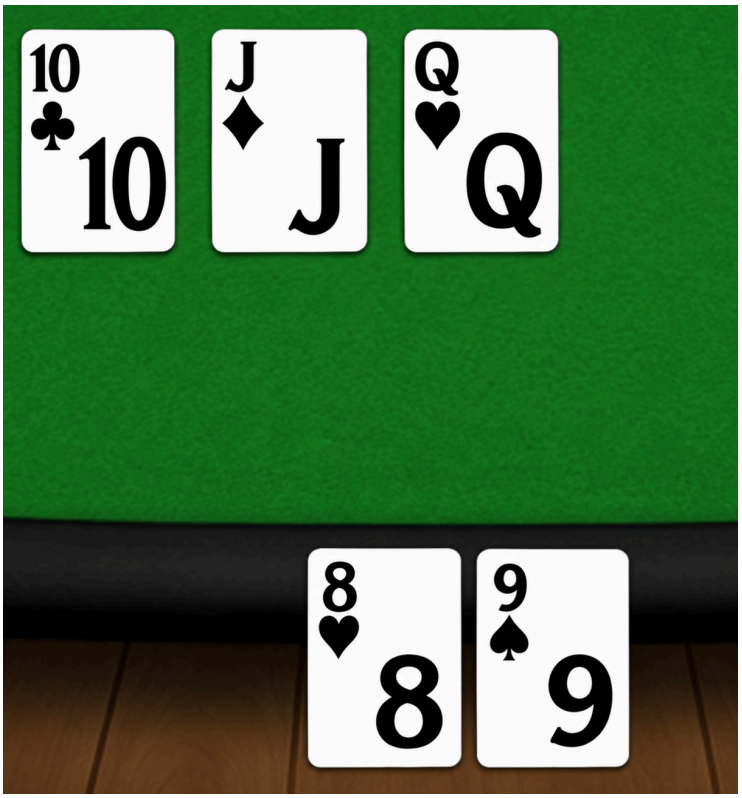

- A♠
- A♥
- A♦
- A♣
- 8♠
- J♦
- K♣

Required balls are:

- Ball 1
- Ball 8
- Ball 11
- Ball 13

Since all four Aces represent Ball 1, Ball 1 only needs to be pocketed once.

Card Display/Design

Card design final:
Small number on top left
Small suit after number on top left
Big number on bottom right
Card white background

Number and suit, black text
